Education

University of Maryland

Bachelor of Science in Computer Science | Minor: Business

College Park, MD

Expected May 2029

Experience

University of Maryland — Division of IT, Classroom Support

March 2026 – Present

Student Field Technician

College Park, MD

- Diagnose and resolve AV, projector, networking, and lecture-capture issues across 50+ classrooms under time-critical SLAs; triage faculty and staff support tickets using systematic root-cause analysis to minimize instructional downtime
- Collaborate with full-time IT engineers on infrastructure audits and preventive equipment inspections across classrooms and event spaces

Hack4Impact — Full-Stack Developer & Project Designer

September 2025 – January 2026

Full-Stack Developer & Project Designer

- Built full-stack web applications in React.js, Firebase, and Node.js for nonprofit clients in an Agile/Scrum environment, shipping features on two-week sprint cycles
- Translated client requirements into Figma prototypes for a resource-management platform serving 200+ users, cutting design-iteration cycles by 30%

Projects

VolterraAI | AI Options Research Copilot

May 2026 – Present

- Built a multi-agent AI pipeline pulling options flow from Tradier and market data from yfinance; calls Claude Sonnet with structured few-shot prompts to generate JSON trade setups and caches results in Redis — cutting redundant API calls by ~80%
- Designed and deployed a full-stack web app on Railway and Vercel with Supabase JWT auth, a trade journal with outcome tracking, and a daily email digest via Resend to 5 active users
- Implemented a strategy classification agent using Claude that tags setups across 7 categories and sends personalized alerts when a scan matches a user's stated strategy preferences

EchoSense | Real-Time ASL Interpreter | 5th Place, ML Track – Bitcamp 2026

April 2026

- Built a browser-native ASL interpreter tracking 21 hand landmarks at 30 fps via Google MediaPipe WebAssembly with zero server round-trips, supporting three translation modes (Phrase, Spell, Sentence)
- Engineered a custom ASL grammar pipeline (Lexer, Parser, LLM Evaluator) powered by Claude Sonnet to convert ASL syntax into grammatically correct English, paired with ElevenLabs Turbo v2 voice synthesis

202 Connect | AI-Powered Civic Resource Platform | BisonHacks, Howard University

February 2026

- Architected a multilingual civic platform on Firebase serving 116,000+ DC residents; built a ward-level demand heatmap with Leaflet.js reducing resource discovery time by 40%
- Implemented a five-factor AI Trust Score via Google AI Studio API to surface credible community resources through automated scoring

Leadership

NVIDIA — Summer Bridge Learning Program

June - August 2026

- Selected for NVIDIA's competitive summer learning program; engaged with GPU computing, AI infrastructure, and accelerated computing concepts through technical sessions led by NVIDIA engineers

EY CHARGE Program — Participant

June - July 2026

- Completed EY's 6-week virtual leadership development program for student organization leaders, engaging in self-directed modules and peer collaboration across institutions

Code:BLACK — Historian

Fall 2026 – Present

- Document and preserve the organization's history, events, and milestones; maintain records and produce content that reflects the chapter's impact within the UMD community

Adobe — Student Brand Ambassador

Fall 2026 – Present

- Represent Adobe on campus by promoting Creative Cloud tools to students and faculty, driving product awareness through peer-to-peer outreach and events

Data Justice Scholars Program — Student Ambassador & Peer Mentor

March 2026 – Present

- Represent the program at prospective student events and mentor underclassmen on study strategies, academic planning, and navigating university culture through one-on-one check-ins

Technical Skills

Languages & Frameworks: Java, JavaScript, Python, TypeScript, React.js, Next.js, Node.js, FastAPI, TailwindCSS, Vite

Cloud & Infrastructure: AWS (EC2, S3, VPC), Microsoft Azure, Google Cloud Platform, Firebase, Supabase, Railway, Vercel, PostgreSQL, Redis

Networking & Systems: DNS, TCP/IP, HTTP, REST APIs, Linux/Unix, AV/IT Systems

Tools & Methods: Git/GitHub, Postman, Figma, Agile/Scrum, CI/CD, Anthropic API, Resend
